

**RESIN COMPOSITIONS AND METHODS OF USING RESIN COMPOSITIONS TO
CONTROL PROPPANT FLOW-BACK**

Abstract of the Disclosure

[027] The present invention described a resin composition comprising from about 5% to about 30% phenol, from about 40% to about 70% phenol formaldehyde, from about 10 to about 40% furfuryl alcohol, from about 0.1% to about 3% of a silane coupling agent, and from about 1% to about 15% of a surfactant and methods of using of that resin in controlling particulate flowback from a subterranean formation.
